

Heath Tile

Specifications and Pricing

Our love of beautiful materials finds its purest expression in Heath Tile. Perfectly imperfect tiles reflect an intention, a pride in craft, the truth of quality, and the beauty in simplicity. They are made by real people, glazed using traditional techniques, fired, and finished in our San Francisco tile factory.

Since Edith Heath became the first non-architect to win the prestigious AIA Industrial Arts Medal for the exterior tile on Pasadena's Norton Simon Museum, Heath Tile has been known for its high quality and handcrafted aesthetic. The variation of the hand glazed tile contrasts with the modern lines of the many complementary shapes. Heath Tile glazes remain unmatched in their range, texture and depth of color — the legacy of Edith Heath's life work that continues to endure today.

We start with our original brown and white clay bodies and press, glaze, trim, and fire each tile to create a versatile, beautiful and durable product (and installation) that reflects the care that went into its making.

Heath Tile is not your average tile. Take advantage of its unique, handcrafted characteristics for your project. The iconic, mid-century aesthetic gives way to truly unique, varied, and individual installations ranging from home environments to large-scale public spaces.

We Have Two Ways to Think About Our Tile

MADE-TO-ORDER

Our Made-to-Order collections are Classic Field, Tapestry, Dwell Patterns, Mural, Dimensional, Stan Bitters, Dual Glaze Rectangles and Dual Glaze Triangles. You order the shape and glaze, we make it for you. Made-to-Order tile has a lead time associated with it, which varies by collection.

IN-STOCK

Our In-Stock Palette is a versatile collection of eight finishes in one size. It is generally available for same day purchase and pick up in our showrooms. There's absolutely no difference in the quality of tile. We're able to offer more competitive prices by producing more of these focused offerings.

Our Tile Collections

MADE-TO-ORDER

Classic Field p. 11

20 sizes, 100+ glazes

Our Classic Field tile is celebrated for its versatility. This expansive collection of shapes and sizes allows for a broad range of installation possibilities.

MADE-TO-ORDER

Tapestry p. 12

4 small sizes, 8 face mounted patterns

Designed to highlight the patterns and possibilities of our Classic Field tile, our Tapestry collection showcases what makes Heath tile so versatile and unique.

MADE-TO-ORDER

Dwell Patterns p. 13

3 modular shapes, endless patterns

Two-dimensional shapes are matched with the long-standing qualities of Heath tile to provide unique patterns with hand-crafted beauty and individual variation.

MADE-TO-ORDER

Mural p. 14

1 face mounted pattern, 8 unique glaze palettes

The first of our Mural patterns is Twill, which uses six glazes on Dwell Patterns Little Diamond tiles within a single install, creating a kinetic, dimensional effect.

MADE-TO-ORDER

Dimensional p. 15

6 shapes, 100+ glazes

The sculptural, three-dimensional surfaces have a distinct form that bridges the gap between art and functional tile.

MADE-TO-ORDER

Stan Bitters Tile (please inquire)

3 shapes, 10+ finishes

Our most sculptural tile yet, made in collaboration with California based ceramic artist Stan Bitters. A beautifully rugged surface shows off a deep love and engagement with ceramics, and allows for more artful use beyond simply covering a wall. Ask a tile specialist for a Stan Bitters Tile Spec Booklet for collection details.

MADE-TO-ORDER

Dual Glaze Rectangles p. 16

6 sizes, 8 matte/glossy glaze combos

Taking variation and contrast to a new level, glazes are overlaid on a single tile, creating the illusion of varying tile sizes within an installation.

MADE-TO-ORDER

Dual Glaze Triangles p. 17

8 glaze blends, 8 patterns

Beautiful geometry crosses time and place. A palette that's light and dark, matte and glossy, high and low contrast, textured and smooth, glazed and unglazed. Eight patterns can be arranged with each glaze blend.

IN-STOCK

In-Stock Palette p. 18

1 size, 8 glazes

An in-stock offering of one size in a special palette of matte and glossy finishes, including two unglazed options. The depth and character of the collection is refined and contemporary, and endlessly versatile.

Classic Field

Stan Bitters

Dimensional

Dwell Patterns

Trims

*Premium sizes. 12x12 available in manganese clay only.

** Additional lengths available

† Nominal tile dimensions are derived from the L x W of the rectangular module the shape fits within.

†† Not intended for use on wall corners.

NOTE: Drawings not to scale.
Measurements denoted L x W x H.

A Guide to Tile and Glaze Qualities

TILE QUALITIES

The tile we make is perfectly imperfect. We celebrate the variation inherent in our product. Because each piece is unique, it's important that we share a few tips to keep in mind as you develop your project to help ensure your Heath Tile installation is successful and meets expectations.

Applications

Heath Tile is very durable and thus suitable for most interior and exterior applications, including warm and cold climates (freeze/thaw), residential and commercial floors, walls, counters, showers, baths, swimming pools, spas and fountains.

Tile Variation

Our white clay body shrinks more than our manganese clay body; make sure if you are combining these two types of clay bodies within a single installation that you make adjustments appropriate for each individual installation.

Size and Length Variation

Our tile shrinks about 12% in the production process. The "about" means it's not an exact science and variation in size and length (however slight) can occur. You can expect $\pm 1/16$ " variation, especially on longer tiles.

Lengthwise Bowing

If you force an elastic material, like clay, into a mold, it will attempt to regain its original shape as it moves through the production process. For this reason, you can expect your tile to have what we deem to be an acceptable amount of lengthwise bowing, especially in our longer shapes. This can be accommodated by a wider grout line and thoughtful placement during installation.

Surface Undulation

Surface undulation can occur for the same reason that bowing occurs — an elastic material is forced into a flat mold. Undulation can occur anywhere on the surface, and could include a slightly raised corner or edge.

Modularity

Not all of our tile sizes are modular with themselves or with other sizes. If your design uses more than one clay body or size be sure they will work together with a recommended grout spacing.

Clear Face Mounting

Nothing beats a hand installation of handmade tile, however some of our smaller tiles can be ordered face-mounted onto adhesive sheets (rather than the more common mesh backing) — set patterns apply. Our clear tape face mounting should be considered as a visual guide for assembling tile pieces, not a modular assembly. Adjustments do need to be made during installation (pre-grout), including slicing/moving of individual pieces and/or partial modules in order to achieve optimum grout spacing and variation blending.

Tile Dimensions + Performance

| type | +/- | tile size |
|-------------------|------------|-----------------|
| size/length | 1/16" | 6", 8", 9", 12" |
| thickness (5/16") | 1/16" | all |
| lengthwise bow | up to 1/8" | 8", 9", 12" |

Bond Strength – ASTM C 482; 124 psi average (50 psi required)

Breaking Strength – ASTM C 648; 422 lb average (250 lb or greater required)

Water Absorption – ASTM C 373; .082% average (impervious = .5% or less, vitreous = .5%–3%)

Weight – approximately 3 1/2 lb per sq.ft.

A Guide to Tile and Glaze Qualities

GLAZE QUALITIES

Use this guide in combination with the glaze palette tables on the following pages. More information about unglazed tile is available in a separate spec sheet, please ask a Tile Specialist to learn more.

Glaze Variation

Variation in the glaze color/texture is rated 1–5+. Glazes rated 1 exhibit very little variation; higher ratings show very high tonal, textural, hue, and finish shifts. For glazes with a variation of 4 or above, it is recommended to request several samples to accurately depict the effect the variation will have on the installation. Variation in color and finish cannot be specified. Glossy and matte formulas are unique to each glaze.

Acid Resistance

Tile glazes without a (+) are not acid resistant and may change over time with repeated/prolonged exposure to products with acidic ingredients.

Pools

Tiles NOT recommended for use in pools (without a +) are also generally not acid resistant, and usually contain copper, which can discolor.

Residential Floors

Softer glazes and glossy finish glazes are not recommended for flooring as they are slippery when wet and will show scratches more readily.

Commercial Floors

Commercial floors generally require a high slip-resistance rating based on industry standards. While matte glazes would be more suitable for commercial use, individual testing must be performed on a case by case basis. Please contact a Tile Specialist for more information.

Crazing

Crazing is the development, over time, of small surface cracks that do not affect the structural integrity of the tile. No guarantee is made against crazing.

Sealing

Matte, crackle glazes, and unglazed tile will benefit from a pregrout seal to aid in grout haze removal and prevent staining from saturated grout colors. Once installed, textured matte, crackle glazes, and unglazed tile should be sealed again after grouting to protect the grout and glaze, and potentially re-sealed annually if in a wet location or food prep area. This is particularly important for crackle glazes as the crackle will continue to develop.

INSTALLATION + GROUTING CONSIDERATIONS

Zip, zero, zilch tile installations look good before grouting. Here are our top tips for ensuring a successful installation. Visit our website at heathceramics.com/tile for additional installation advice and ideas.

Planning

Meticulously plan your layout. The time taken for prep and placement will greatly impact the finished result. Pre-sort tile by size, color, and finish. Blend or strategically place. To achieve a leveled surface, use a deeper comb or mortar or thinset to allow for variations in tile thickness and architecture.

Grout

Grout is the glue that pulls the entire installation together. Give special consideration to choosing the right color and be sure to use a sanded grout formulated for 1/8 – 1/4" spacing (and no larger). Some sanded grout may contain large/sharp aggregate that can scratch tile. If you're grouting glossy tiles, we recommend testing the grout prior to grouting your installation. Every bag can be unique so if your installation requires multiple bags, test each bag. Be sure to follow the manufacturer's instructions for mixing and applying grout. Stan Bitters Tile should be installed without grout. Ask a Tile Specialist for the Stan Bitters Tile Spec Booklet for installation details and advice.

Grout Spacing

Heath tile sizes are nominal dimensions based on our suggested grout spacings. Tighter grout spacing will require more tiles than the listed square footage. Please refer to the guide below for our minimum recommended grout widths. In some cases, an even wider grout line may be necessary to achieve the best overall look depending on specific tile characteristics and installation. Thoughtful grout spacing can compensate for tile variation. Don't rely on one size spacer; shimming will help maintain level lines throughout the installation.

Recommended Grout Spacing Guide

| tile size | suggested grout width |
|---|-----------------------|
| 2x2, 2x4, 2x6, 3x3, 1x3, 3.5" hex, 4" right triangle, little diamond, half hex, wide hex | 1/8" |
| 2x8, 2x9, 3x6, 2x12, 3x9, 3x12, 4x4, 4x8, 6x6, 5" hex, 6" right triangle, bowtie, oval, diamond, dimensional triangle | 3/16" |
| 6x12, 12x12, crease in, crease out | 1/4" |

Pattern swatches above are indicative of the installed pattern but do not represent the shape/size of the mounted module.

* Nominal tile dimensions are derived from the L x W of the rectangular module the shape fits within.

** Pattern is only available mounted.

Mural Pricing

Available in 8 pre-configured color palettes. Refer to the Glaze Qualities chart on pages 7-10 for more information on each glaze.

| style | price/sq.ft. | price/module |
|----------------|--------------|---------------|
| Mounted | 60.00 | 202.00 |

Minimum order – 10 modules (about 34 sq.ft.)

Order quantity – due to the size of the module & nature of the pattern, a Tile Specialist should be consulted to ensure proper order quantity.

Sample kits – glaze samples for each palette are available upon request for \$12; samples are Little Diamond and will come mounted.

Clear face mounting – all pricing includes face mounting.

Grout line – 1/8" recommended.

Trim – please consult a Tile Specialist.

Terms of Sale

Please review quotes carefully, as they become sales contracts upon signing.

A signed contract and deposit are required for an order to be processed. Orders under \$10,000 require payment in full for the order to be processed; orders over \$10,000 require a 50% deposit. Payment is due in full prior to release of the order, including shipping & handling charges. We accept credit cards, first party checks, and payment by wire transfer.

Prices are F.O.B. factory, applicable sales taxes extra.

A storage fee of \$75 a pallet/day may be applied to orders held longer than 15 days.

Cancellation of a signed quote will incur a 15% cancellation fee. Once in production, orders cannot be cancelled.

Shipping and Handling

For orders under 30 sq.ft., small package service will be quoted.

Orders over 25 sq.ft. will be shipped on pallet via Heath's preferred carrier. There is a \$25.00 convenience fee for using other carriers.

Freight fees are passed on at cost, with a \$10.00 pallet charge per pallet used.

We may be able to offer flat rate shipping for orders under 110 sq.ft. Please inquire with a Tile Specialist.

General

Due to the handcrafted nature of our tile, actual size and color variation should be expected.

Price quotes are valid for 30 days. Lead times are re-quoted upon conversion of quote to sales order.

Prices are subject to change without notice.

We recommend ordering up to 15% extra material to cover installation requirements.

Job completions have a minimum order of 4 sq. ft. They are priced at full retail price plus a \$100 order completion fee per line item.

THIS CATALOG IS PRINTED ON NEW LEAF INGENUITY, WHICH IS 100% RECYCLED,
CONTAINS 100% POSTCONSUMER WASTE FIBER, AND IS PRODUCED BY ELECTRICITY
